EXPERIENCE

FRONTEND DEVELOPER (remote)

Jan 2024 – Present

Illuminext

- Built responsive, component-based UIs using React and modern JavaScript (ES6+), ensuring clean architecture and reusable code.
- Integrated REST APIs and managed application state with tools like Context API and Redux to deliver seamless data-driven experiences.
- Optimized frontend performance through code-splitting, memoization, and efficient rendering techniques to improve load time and user experience.
- Implemented reusable UI components, form handling, routing, and responsive layouts using React Router, CSS frameworks, and best practices.

SOFTWARE DEVELOPER

Feb 2023 – Sept 2023

Freethink

- Designing, developing and maintaining applications for Grievance systems, GIS systems, IoT systems, Analytics and Operations management systems.
- Testing existing systems, keeping the code up-to-date and timely reviews of the same.
- Contribution to the technical and non-technical documentation of the systems developed.
- Maintained and tested node.js services.

WEB DEVELOPER

Oct 2021 – Dec 2022

Artbox Global Design Studio

- Built and customized responsive Wix websites using advanced design tools to deliver visually appealing and user-friendly pages.
- Collaborated with clients to gather requirements, tailor templates, and provide continuous support throughout the project lifecycle.
- Improved website visibility and performance through SEO best practices, meta-tag optimization, and site speed enhancements.
- Managed content updates via Wix CMS and resolved technical issues to ensure smooth functionality across all devices.

EDUCATION

Goa College of Engineering

Bachelor of Engineering in Computer Engineering

2017 – 2021
